DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-3, 7-10, 14-24 (partially), and 4 and 11 (completely) drawn to compositions comprising a xylanase, a cellulase a ligninase and a protease, and methods using said compositions.

Group II, claim(s) 1-3, 7-10, 14-24 (partially), and 5 and 12 (completely) drawn to compositions comprising a xylanase, a cellulase, a ligninase and a uricase and methods using said compositions.

Group II, claim(s) 1-3, 7-10, 14-24 (partially), and 6 and 13 (completely) drawn to compositions comprising a xylanase, a cellulase, a ligninase and a pectinase and methods using said compositions.

2. The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The technical features shared by the groups are compositions comprising a xylanase, a cellulase and a ligninase. However, this technical feature is not novel. Covington, et al. (GB 2,325,241 A) disclose a composition comprising a laccase (ligninase), a cellulase and a xylanase for use in the removal of dung from animal hides (page 7, example 4).
